EDUCATION

Bachelor of Science in Computer Science

University of Rhode Island - August 2025

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, JavaScript, TypeScript, Lua
- **Frameworks & Libraries:** Raylib, Node.js, Three.js, Flutter
- **Database Technologies:** SQLite, MySQL, Oracle APEX, Google Firebase
- **Development & Design Tools:** Git, GitHub, GDB, Aseprite, Tiled, Figma, Pico-8

PROJECTS

WalkPoint URI (Capstone University Project) Fall 2024

- Led development of production-ready mobile app using Flutter/Dart and Firebase backend
- Implemented testing strategy including automated UI, unit, and beta testing
- Designed navigation system using OpenStreetMap and Mapbox APIs in Flutter
- Successfully published to Google Play Store and presented at trade show

Inklings Project (C)

- Engineered thread-safe concurrent rendering system using CLI-based architecture in C
- Debugged and optimized performance within a large-scale codebase utilizing GDB

Interactive Portfolio (JavaScript)

- Developed an interactive visualization featuring a 3D navigable interface using Three.js
- Implemented custom input handling, raycasting, and quaternion-based transformations for intuitive UI elements
- Optimized rendering performance within a WebGL-based architecture

Other Projects

- **Raylib Game (C++)** - Created a top-down shooter game in C++ using OOP principles, implementing various low level game processes, learning art design, audio design, level design, gameplay mechanics and many other technical aspects of game development
- **Wordle Bot (JavaScript)** - Designed a custom bot to display previous Wordle words for discord using Node.js
- **Sand Falling program (C++)** - Physics-based particle system simulation in using Raylib in C++

RELEVANT WORK EXPERIENCE

URI ITS Department Intern | May 2025 - August 2025

- Developed responsive frontend interface for enterprise database management and data visualization
- Architected user interface solutions using Oracle APEX platform for institutional data systems
- Implemented security protocols and multi-factor authentication for sensitive information management

OTHER WORK EXPERIENCE

Legal Assistant | February 2022 - Present

- Automated PDF document processing using Python, reducing redundant workload
- Managed digital filing systems and maintained database integrity
- Coordinated legal documentation and client communications

INTERESTS/HOBBIES

- Game Development, Olympic Weightlifting, Chess, BJJ/Muay-Thai, Running, Calisthenics, Cycling, Video Games
